Connect online for a unique experience to a virtual run and exercise together with your cohort or join in sports communities to share sports achievements with friends and families.

OVICX TREADMILL

PRODUCT SPECIFICATIONS:

Motor Power: 0.75
 Running Belt: 42 x 120cm
 Max Speed: 12km/h
 Max Weight Capacity: 100kg

- The foldable treadmill is specially designed for the home environment. Your home is the gym.
- With an area of 0.5m², a weight of 39.5kg and a console-free design.

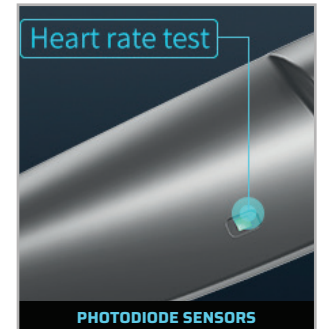

For the heart of the treadmill, the SmartRun uses Japan imported Fuji Motor for reliable and quiet workout experience.

It is equipped with touchscreen LED display that shows time, distance, speed, calories consumption and heart rate and has six different built-in programs.

This special feature is important for a treadmill as prolong running is straining to the knees.

Similar to technology used in heart rate watch, the sensors provide fast and accurate heart rate readings to keep you in the target zone.
